

Application to Subdivide Land

1. **Location of Land to be Subdivided:**

Municipality (City, Town, Village, RM)

_____ 1/4 Sec. _____ Twp. _____ Rge. _____ Mer. 1

Lot(s) _____ Block(s) _____ Plan/Parcel No. _____

2. **The Proposed Subdivision involves:**

Plan of Proposed Subdivision

Parcel Tie Removal
(describe and include parcel pictures)

Other Subdividing Instrument (lease, easement)

3. **Legal and Physical Access to the Subdivision is via:**

Grid Road Highway Resource Road Northern Crown Land

Main Farm Access Urban Street Road Allowance Trail

Paved Gravel Unimproved

4. **Physical Nature of the Land to be Subdivided:**

a) What is the physical nature of the proposed lot(s) or parcel(s)?

Wooded/Treed Cultivated Pasture Hilly Level/Flat Low/Swampy Adjacent to a Lake, River, or Creek

Describe the physical nature in more detail:

b) Drainage:
How will the proposed lot(s) or parcel(s) be drained?

Natural Ditches Curb and Gutter Storm Sewer

Do you propose to discharge surface water into a highway ditch or waterway? Yes No

Show drainage courses on the Plan of Proposed Subdivision.

5. **Land Use:**

a) What is the land presently used for?

Agriculture Residential Seasonal Recreation (Cottage) Commercial Industrial Other

Describe the present land use in more detail:

b) What is the **intended** use of the proposed lot(s) or parcel(s)?

Agriculture Residential Seasonal Recreation (Cottage) Commercial Industrial Other

Describe the intended use in more detail:

c) Are there any buildings on the land being subdivided? Yes No

Indicate the location, distance from the property boundary and use of all buildings and utility lines on the Plan of Proposed Subdivision/ Parcel Picture.

6. Services:

- a) Water Supply is: Existing Proposed Not Required
- Communal System Cistern Lake / Waterbody
- Municipal Well Private Well Other

Describe / specify proposed water source: _____

- b) Sewage Disposal is: Existing Proposed Not Required
- Municipal Private-On-site (please specify below)
- Mound Chamber Holding Tank
- Jet Type Absorption Field Other

Describe / specify proposed sewage disposal system: _____

Please show all set back distances from the property boundary, house, well and water course(s) on the plan of proposed subdivision.

7. Utility Services:

- Electrical Power is: Existing Proposed Not Required Not Available
- Telephone service is: Existing Proposed Not Required Not Available
- Natural Gas is: Existing Proposed Not Required Not Available

8. Surrounding Land Uses:

If the proposed subdivision is in a Rural Municipality, are any of the following within 5 km; or
 If in an Urban Municipality, are any of the following within 500 m? Check all that apply.

If checked, please state distance

<input type="checkbox"/> Airport _____	
<input type="checkbox"/> Intensive Livestock Operation _____	
<input type="checkbox"/> Sewage Treatment Facility or Sewage Lagoon _____	
<input type="checkbox"/> Landfill for disposal of garbage or refuge _____	
<input type="checkbox"/> High Voltage Power Transmission Line _____	
<input type="checkbox"/> High Pressure Gas Transmission Line, Oil Line (specify) _____	
<input type="checkbox"/> Industrial Commercial Operation (specify) _____	
<input type="checkbox"/> National, Provincial or Regional Park _____	
<input type="checkbox"/> Residential Lot(s) _____	
<input type="checkbox"/> Water Body or Course _____	
<input type="checkbox"/> Cemetary _____	
<input type="checkbox"/> School Bus Route _____	
<input type="checkbox"/> Urban Municipality _____	
<input type="checkbox"/> Water Treatment Plant or Reservoir _____	
<input type="checkbox"/> Oil or Gas Well or Facility (within 500 m) _____	
<input type="checkbox"/> Other (specify) _____	

9. **Additional Comments:**

10. **Other Requirements:**

1. Applications must include a copy of the title to the land being subdivided and the Basic Fees. Also include any relevant permits or approvals obtained from other agencies or a municipality.
2. Basic Fees are \$150 per proposed lot (non-refundable) plus \$150 for a issuance of a Certificate of Approval. The fees are exempt from GST & PST. Make a cheque or money order payable to the Minister of Finance.
3. Applicants may be asked for additional fees and information if found to be needed during the review of an application.
4. Until the review of an application is done and a decision is issued, no binding contracts for the land should be made and no construction or site preparation work should be started.
5. Personal information given on this form is collected pursuant to The Freedom of Information and Protection of Privacy Act and will be shared with other agencies involved in reviewing subdivision applications. If you do not want your personal information to be shared, contact the Community Planning Branch to discuss your concerns before submitting a completed form.

11. **Applicant(s):** *(persons making application and to whom correspondence should be addressed)*

a) Name of registered owner of land to be subdivided:

Name: _____

Address: _____

City/Town/Village: _____

Prov.: Saskatchewan Postal Code: _____

Email: _____ Tel.: _____

b) Land Surveyor / Planner / Lawyer /Agent (specify):

Name: _____ Company Name: _____

Address: _____

City/Town/Village: _____

Prov.: Saskatchewan Postal Code: _____

Email: _____ Tel.: _____

c) Declaration by registered owner:

I, _____ hereby certify that I
(Full name in block capitals)

am the registered owner of the land proposed for subdivision.

am authorized, in writing, to act as the registered owner per Sections 2(d) and 5(3) of *The Subdivision Regulations, 2014*, I hearby swear that all statements contained with this application are true, and I make this solemn declaration conscientiously believing it to be true, and knowing that it is of the same force and effect as if made under oath, and by virtue of the Canada Evidence Act.

Signature: _____ Date: _____

Name: _____ Address: _____

City/Town/Village: _____ Prov.: SK Postal Code: _____ Tel: _____

Replies are to be sent to (please specify): a b c

This guide applies to anyone subdividing land where the Province of Saskatchewan is the subdivision approving authority. In this situation, subdivisions are reviewed by the Community Planning Branch (CPB) of the Saskatchewan Ministry of Municipal Affairs (MA). The subdivision approval process is similar whether you are a private land developer or a municipality. All subdivisions must comply with *The Subdivision Regulations* and the *Dedicated Lands Regulation, 2009* as set out under *The Planning and Development Act, 2007* (PDA).

Understanding the issues that may arise, the government agencies involved and the information they require will help facilitate the subdivision process and avoid or limit delays.

Do I require subdivision approval?

An application for subdivision approval is required to:

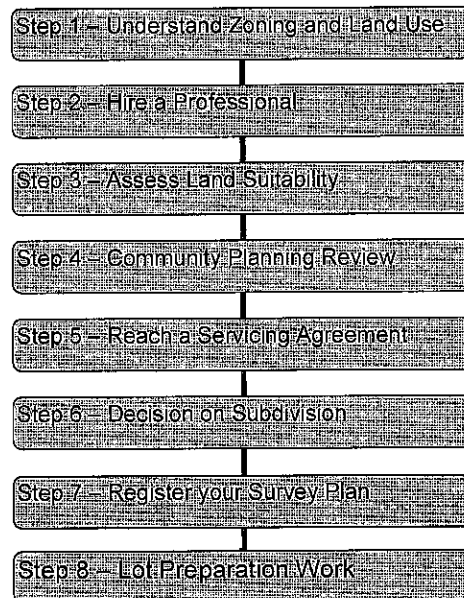

- obtain a title to part of an existing parcel;
- move an existing property line;
- divide land into lots or roadways;
- remove a parcel tie;
- secure an interest in part of a parcel for mortgage, sale or easement; or to

- secure an interest for lease of part of a parcel with a term of 10 or more years.

Applications to subdivide require a plan prepared by either a Saskatchewan Land Surveyor (SLS) or a Professional Community Planner (PPS).

Remember subdivision approval is required BEFORE any work is undertaken or lots are sold.

The following step-by-step guide explains the subdivision process, to save time and money and help developers identify unexpected costs. The information in this guide is organized into eight steps:

Step 1

Understand Zoning and Land Use

If a municipality has a zoning bylaw, it will establish zoning districts for areas within the municipality and list the permitted and discretionary uses in each zone. If a use is not listed within a zone as “permitted” or “discretionary” it is considered to be prohibited.

Permitted Use – A permitted use is a use of land or buildings, or form of development that is allowed in a zoning district. It also needs to comply with specific requirements in that particular zone. If all requirements are met, a request for a permitted use must then be approved by the development officer.

Discretionary Use – A discretionary use is a use of land or buildings, or a form of development that may be allowed in a zone if certain standards or conditions can be met. Prior to making a decision, council must evaluate the use’s compatibility against criteria in the zoning bylaw, notify the public and hold a public hearing. Council may approve a discretionary use, and may attach standards or conditions to the approval. The standards and conditions can be appealed to the local Development Appeals Board, but the decision on the use cannot.

If your proposed development is in an area which is not zoned for that particular use, you may wish to apply to council for a bylaw amendment. Depending on the situation, council will consider adding the use to the list of permitted or discretionary uses

within the existing zone, or rezoning the land for a different use. For example, land may be rezoned from *Agriculture* to *Residential* to accommodate new housing developments.

Alternatively, you may revise your proposal to meet the existing bylaw requirements or relocate your proposal to a different zone where it is a permitted or discretionary use.

Step 2

Hire a Professional

Hiring a professional SLS or PPS is necessary in most cases to obtain approval. Land surveyors and community planners deal with subdivision proposals regularly; their experience and technical expertise can help speed up the process.

The Survey or Planning Firm can:

- prepare an application and plan of proposed subdivision;
- submit the application for subdivision for CPB to review;
- help you acquire additional information requested by government agencies reviewing the subdivision; and
- assist you with any revisions to your subdivision application that may be needed.

Depending on the nature and complexity of the project, developers may also require the services of other professionals, such as engineers to prepare geotechnical reports.

Note: when removing a parcel tie, survey plans are not required.

Step 3

Assess Land Suitability

Before purchasing land for subdivision a developer should assess land suitability. Many of the problems that delay subdivisions may be avoided if the land chosen is suitable for subdivision and development.

Land Assessment Checklist

This checklist identifies the factors considered by the CPB when reviewing a subdivision and will help you recognize potential issues that may arise in an application. You may not be able to answer all the questions without seeking professional advice; however the questions do identify the issues which should be addressed. Developers should be aware that each subdivision is unique and additional information may be required during the subdivision process.

If the answer to any of the following questions is "yes" seek advice from the agency or professional organization listed.

Note: A glossary of agency and organization abbreviations appears at the end of Step 3.

Topography

- ◆ Are there obvious topographic issues that could affect your ability to develop or potentially cause structural failure:
 - steeply sloping land
 - building sites on or near a drop-off, like a hill, cliff or coulee; or
 - slumping, creeping or other indicators of slope instability?

For information contact: CPB, MUN.

Soils

- ◆ On the proposed site, is there any evidence of:
 - loose or swampy soils;
 - soils shifting, heaving or cracking, e.g. damaged foundations in the area;
 - showing evidence of expansive soil conditions; or
 - soils which may be polluted by a prior use or adjacent to a potentially polluting use?

For information contact: CPB, MUN, ENV, SWA

Surface and Sub-surface drainage

- ◆ Is there obvious evidence of:
 - streams, ditches or natural drainage pathways;
 - pooling of water where buildings are existing / proposed;
 - drainage, which may or may not be polluted, from neighbouring lands onto your property;
 - possibly polluted drainage onto the land from adjacent uses; or
 - drainage from your property onto adjacent lands?

For information contact: CPB, SWA, ENV, MUN.

4) Potential for flooding, subsidence, landslides or erosion

- ◆ Is there:
 - a history of flooding in the area;
 - land below the safe building elevation (1:500 year flood elevation plus ½ metre for wave action);
 - building proposed near a water body;

- swampy or wet soils; or
- evidence of previous landslides or erosion?

For information contact: CPB, DFO, MUN, ENV, SWA.

Easements or Interests

- ◇ Are there any registered or non-registered easements/interests on the land?

Note: Utility companies are not required by law to register all interests on title.

- For information on registered easements/interests contact ISC.
- For information on **NON registered easements**, contact *Sask 1st call.*

Communal Water Supply, Sewage Disposal and Solid Waste Disposal Systems

- ◇ Will the municipality require the subdivision to provide:
 - water;
 - sewage disposal;
 - solid waste disposal; and/or
 - on-site septic requirements?

For information contact: CPB, ENV, RHA, SWA, SWC, MUN.

Servicing

- ◇ Does your subdivision proposal address:
 - road access;
 - fire, police and ambulance services;
 - water or sewer connections;
 - power lines;
 - phone lines;
 - gas lines (where available);

- surface drainage systems; or
- a temporary or permanent disruption to services elsewhere in the municipality?

Note: In order to facilitate servicing which meet development timelines, developers should contact utility companies as early as possible to discuss processes and scheduling requirements.

For information contact: CPB, MUN, SKP, SKT, SKE, TG.

Existing and proposed uses of land in the vicinity

- ◇ Is there a neighbouring, existing or proposed land use that could conflict with your development as a result of odour, dust, noise, traffic, or light pollution, such as:
 - a sewage treatment plant;
 - an industrial development;
 - a mining facility;
 - a large farming or intensive agricultural operation;
 - a storage site for gas, oil, mining materials, or other flammable liquids on your property;
 - residential subdivisions; or
 - large entertainment complexes?

For information contact: CPB, MUN, AG, SWA, ENV, RHA.

Streets, lanes, traffic flow and public safety

- ◇ Does your proposal include new streets, roads or lanes?

If so, the design of the infrastructure is required to meet the standards set out in Section 16 of *The Subdivision Regulations*, found at:

<http://www.qp.gov.sk.ca/documents/English/Regulations/Regulations/P13-1R1.pdf>

◇ Is your proposal adjacent to a provincial highway?

◇ Does your subdivision comply with the local zoning bylaw concerning:

- sidewalk locations and designs;
- intersections and access points;
- walkways; and
- curb crossings?

Site design and orientation

◇ Does your subdivision comply with the local zoning bylaw concerning:

- site size and shape;
- site location;
- site frontage;
- site shape;
- minimum front, side and back yard setbacks with a building;
- number of buildings allowed on a single site;
- building location and utility lines;
- minimum and maximum building size and height requirements; or
- maximum developable area for the proposed building(s)?

For information contact: CPB, MUN, *Sask 1st call*, SKE, SKP, SKT, TG.

The protection of fish and wildlife habitats

◇ Is your proposed subdivision:

- close to a wildlife reserve, protected wetland, environmental reserve land or other protected natural ecosystem;
- draining into a lake or water body containing fish and wildlife; or

- adjacent to a lake, river, or other tributary?

For information contact: CPB, MUN, SWA, DFO, or ENV.

The protection of significant natural or historical features

◇ Have you submitted a description of your subdivision for a heritage resource assessment?

(www.tpcs.gov.sk.ca/SensitiveLocations)

For information contact: CPB, MUN, HER.

Setbacks

◇ Is your proposed residential subdivision:

- within 1500 metres of the water intake for a water treatment plant;
- between the reservoir and a line established for flood control or reservoir/water supply protection;
- less than 457 metres from a landfill;
- less than 300 metres from a sewage treatment plant or sewage lagoon; or
- within 300 metres of an intensive livestock operation?

For information contact: CPB, MUN, RHA, ENV, SWA, AG.

Public Lands

◇ Have you:

- made arrangements to provide land for Municipal Reserve, cash in lieu of land or have the requirement deferred; or
- discussed where and how reserve must be given with council?

◇ Will the proposed subdivision:

- require a school, park or recreational facility;
- stress the capacity of existing civic facilities; or
- require additional civic facilities?

For information contact: CPB, EDU, MUN.

Although this checklist will not guarantee you will avoid delays in the subdivision and approval process, it will help you to avoid common mistakes and predict possible issues.

Glossary of Abbreviations:

CPB- Community Planning Branch
 DFO- The Department of Fisheries and Oceans Canada
 ENV- Ministry of Environment
 ER- Ministry of Energy and Resources
 HER- Heritage Branch of the Ministry of Tourism, Parks, Culture and Sport
 HI- Ministry of Highways and Infrastructure
 ISC – Information Services Corp
 MA – Ministry of Municipal Affairs
 MUN- Municipality
 SWA- Saskatchewan Watershed Authority
 SWC- Saskatchewan Water Corporation
 RHA- Regional Health Authority
 SKE- SaskEnergy
 SKP- SaskPower
 SKT- SaskTel
 Sask 1st call (1-866-828-4888) to request line locations and verify utility ownership
 TG – Trans Gas

Step 4

Community Planning Review

Subdivision applications are assigned to a Planning Consultant at CPB who works with the applicant and the municipality throughout the process. For more information on who to contact see:

<http://www.municipal.gov.sk.ca/CPM/ap-Planning-Consultant-Areas>

The Planning Consultant will review the application for:

- compliance with any local or district official community plans and zoning bylaws;
- compliance with the PDA, *The Subdivision Regulations* and *Dedicated Lands Regulation, 2009*.
- site suitability; and
- access and servicing requirements.

The Planning Consultant also refers the application to ministries and agencies determined to have an interest in the proposal for comment. The applicant will be advised of the need for any additional information.

Step 5

Reach a Servicing Agreement

A servicing agreement is a legal contract a municipality may require a subdivision applicant to enter into under the PDA. The servicing agreement establishes the developer's responsibility to install, or pay for, services in a subdivision, which will be maintained and operated by the municipality once installed.

The agreement may cover services and facilities that directly or indirectly serve the subdivision. It ensures that capital costs of servicing are paid for by the new development and that services are installed to municipal specifications and standards. Overall, it provides certainty and transparency for the developers, municipalities and homebuyers.

When establishing a servicing fee, municipalities should also consider the impact of the development on off-site infrastructure. For example additional wastewater requirements from a new subdivision may require a new or expanded sewage lagoon. The total cost is then proportioned among existing and expected development that will use the lagoon. Off-site fees must be assigned to a separate account, along with accrued interest and may only be withdrawn for the specified construction projects.

A servicing agreement should have performance guarantees, construction specifications, time limits, and a completion date. The agreement terminates when the developer completes construction of the services listed to the specifications of the municipality.

A servicing agreement will typically require the construction of the following on-site services:

- grading and leveling of the land;
- graded, graveled or paved roads, streets and lanes connecting to the subdivision;
- sidewalks, boulevards, curbs, gutters, lighting;

- storm sewers, sanitary sewers, drains, water mains, laterals, service connections, and fire hydrants;
- street name plates and poles;
- landscaping of parks and boulevards;
- public recreation facilities; or
- any other public works that a council may require (e.g. power, gas, telecommunication lines).

An agreement may also require the developer to pay servicing fees or off-site fees to the municipality to cover the capital costs of altering, expanding or upgrading infrastructure or services which directly or indirectly serve the subdivision. In this case the municipality installs the services, which typically include:

- sewer, water, drainage or other utility systems;
- municipal streets and roads; or
- park and recreation space and facilities.

Most servicing agreements contain a warrantee period where the developer is required to repair any construction deficiency.

Note: Outside of the servicing agreement, developers should be aware that they will need to enter into a separate agreement with the individual utility companies, detailing the location and installation of services. Utility companies require approval from both the developer and the municipality before they will begin construction.

If a municipality requires a servicing agreement, the applicant has 90 days

to enter into the agreement. The time limit may be extended by mutual agreement.

Before a servicing agreement is signed, the developer has the right to appeal the need for a servicing agreement or the terms of an agreement to the Saskatchewan Municipal Board.

The approving authority cannot approve the subdivision application if the servicing agreement is unresolved.

Step 6 Decision on Subdivision

At this point in the process, you have likely resolved any issues, provided all appropriate information and signed a servicing agreement, should one be required.

If your land is properly zoned and you have addressed provincial and municipal requirements, a decision can now be made on your application.

Your subdivision application may be:

- approved;
- approved with conditions; or
- refused.

The decision is sent to the subdivision applicant (which may be the surveyor), the municipality, and any other parties (usually ministries or agencies) who were determined to have an interest in the application.

Revisions and Appeals

If the developer disagrees with any conditions of approval, they can file

an appeal with the Saskatchewan Municipal Board.

If a subdivision application is denied, the developer may reapply once the issues have been resolved or they can appeal the decision to the Saskatchewan Municipal Board.

Information on appeals and an appeals guide can be found at: <http://www.municipal.gov.sk.ca/Programs-Services/Community-Planning/Appeals/>

Step 7 Register your survey plan

Once your subdivision has been approved and you have accepted the conditions of the approval, you or your surveyor may contact ISC to register your survey plan and apply for new titles to your subdivided lands. This is the last step in the subdivision process.

Step 8 Site preparation work

Once the subdivision is registered site, improvements can begin. After registering your survey plan you will need to prepare the site for building.

The developer is responsible for:

- acquiring any necessary permits and or granting easements associated with the installation of utilities, infrastructure development or services;
- contouring as defined in engineering plans;
- arranging for the installation of gas, telephone and electrical services (contact with service

- agencies should be made in advance of final approval);
- arranging for the relocation of any existing utilities that do not conform to the proposed subdivision plan;
 - installation of infrastructure outlined in the servicing agreement – e.g. streets, curbs, lighting, or sewer; and
 - all applicable costs associated with joint use servicing charges.

Note: Do not wait until this final step to contact utility companies. Utility installation must be staged, and shallow utilities (e.g. phone) cannot be installed until the development is to final grade and deep utilities (e.g. gas) have been installed and the roads are completed to the sub-base stage.

At this point, the developer may also:

- begin marketing lots;
- develop sales contracts;
- obtain building permits;
- develop show structures; and
- begin municipal reserve development.

Conclusion

The subdivision process can be straightforward however delays may arise. Developments requiring re-zoning may take time as they involve a legislated public process. Good relationships between developers and municipalities will help facilitate timely decisions.

By working together, the developer, municipality and community will ensure the development is a good fit and will meet the present and future needs and interests of the community.

The Ministry of Municipal Affairs, gratefully acknowledges the contributions made by the Regina & Region Home Builders' Association, SaskPower, SaskEnergy and SaskTel in the preparation and review of this information.
